1 [Power-and Energy-Aware Computing: Computation offloading to save energy on handheld](#)

Zhiyuan Li, Cheng Wang, Rong Xu

November 2001 **Proceedings of the 2001 international conference on Compilers, architecture and embedded systems**

Publisher: ACM Press

Full text available:  pdf(256.37 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#),

We consider handheld computing devices which are connected to a server (or a powerful desktop). On such devices, it is often possible to save the energy on the handheld by offloading its computation work, based on profiling information on computation time and data sharing at the level of process graph for a given application program. We then apply a partition scheme to statically divide the

2 [Fairness and load balancing: Fairness and load balancing in wireless LANs using association](#)

Yigal Bejerano, Seung-Jae Han, Li (Erran) Li

September 2004 **Proceedings of the 10th annual international conference on Mobile computing and networking**

Publisher: ACM Press

Full text available:  pdf(377.05 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index to](#)

Recent studies on operational wireless LANs (WLANs) have shown that user load is often uneven among access points (APs). This unbalanced load results in unfair bandwidth allocation among users. Unfair load and unfair bandwidth allocation can be greatly alleviated by intelligently associating users with APs, rather than having users greedily associate APs of best received signal strength. In this

Keywords: IEEE 802.11, approximation algorithms, load balancing, max-min fairness, wireless

3 [Wireless data performance in multi-cell scenarios](#)

T. Bonald, S. Borst, N. Hegde, A. Proutière

June 2004 **ACM SIGMETRICS Performance Evaluation Review , Proceedings of the joint Measurement and modeling of computer systems SIGMETRICS 2004/PERFORMANCE**

Publisher: ACM Press

Full text available:  pdf(410.89 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#),

The performance of wireless data systems has been extensively studied in the context of a single paper we investigate the flow-level performance in networks with multiple base stations. We study the dynamic interaction of the number of active flows in the various cells introduced by the strong interference from neighboring base stations. For the downlink data transmissions that we consider, lower service

Keywords: elastic traffic, fluid regime, insensitivity, multi-class processor-sharing, quasi-static varying service, wireless data networks

4 Havana: supporting application and channel dependent QoS in wireless packet networks

Javier Gomez, Andrew T. Campbell

January 2003 **Wireless Networks**, Volume 9 Issue 1

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(325.55 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index to](#)

For wireless channels, interference mitigation techniques are typically applied at the packet transmission level. This paper presents the Havana framework which supports *integrated adaptive-QoS* in wireless packet networks by addressing impairments over multiple time scales that are present at the flow/session level. The Havana framework employs different control mechanisms that operate over distinct adaptation time scales. At the packet transmission level, packet ...

Keywords: QoS, adaptive wireless networks

5 Research track: Indexing multi-dimensional time-series with support for multiple distance measures

 Michail Vlachos, Marios Hadjieleftheriou, Dimitrios Gunopulos, Eamonn Keogh

August 2003 **Proceedings of the ninth ACM SIGKDD international conference on Knowledge discovery and data mining**

Publisher: ACM Press

Full text available:  [pdf\(906.69 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Although most time-series data mining research has concentrated on providing solutions for a single distance measure, in this work we motivate the need for a single index structure that can support multiple distance measures. The primary goal is the efficient retrieval and analysis of trajectory similarities. Trajectory datasets are very common in many applications, mobility experiments, video surveillance and are especially important for the discovery of interesting patterns.

Keywords: dynamic time warping, longest common subsequence, trajectories

6 Data warehousing and OLAP: Semantic-based delivery of OLAP summary tables in wireless networks

 Mohamed A. Sharaf, Panos K. Chrysanthis

November 2002 **Proceedings of the eleventh international conference on Information and Knowledge Management**

Publisher: ACM Press

Full text available:  [pdf\(251.10 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

With the rapid growth in mobile and wireless technologies and the availability, pervasiveness and mobility of wireless networks, mobile computers are quickly becoming the normal front-end devices for accessing e-business services. We are addressing the issue of efficient delivery of business decision support data in the form of summary tables to users equipped with OLAP front-end tools. Towards this, we propose a new on-demand scheduling algorithm.

Keywords: broadcast pull, broadcast scheduling, mobile computing

7 Technical papers: Characterizing and modeling user mobility in a cellular data network

 Emir Halepovic, Carey Williamson

October 2005 **Proceedings of the 2nd ACM international workshop on Performance evaluation of sensor, and ubiquitous networks PE-WASUN '05**

Publisher: ACM Press

Full text available:  [pdf\(511.63 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index to](#)

The demand for cellular data networks is expected to increase with 3G and beyond technologies and the proliferation of consumer services, such as wireless video and camera phones. User mobility affects quality of service and makes network planning more difficult. This paper presents an analysis of user mobility patterns based on data collected from a regional CDMA2000 cellular network. We find low overall mobility in the network, power-law characteristics in the distribution of mobility patterns.

Keywords: CDMA2000, cellular data networks, network traffic measurement, user mobility, wireless networks

8 Adaptive call admission control for QoS/revenue optimization in CDMA cellular networks

Christoph Lindemann, Marco Lohmann, Axel Thümmler

July 2004 **Wireless Networks**, Volume 10 Issue 4

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(969.76 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index t](#)

In this paper, we show how online management of both quality of service (QoS) and provider revenue in CDMA cellular networks by adaptive control of system parameters to changing traffic conditions. We introduce a novel call admission control and bandwidth degradation scheme for real-time traffic management of a Markov model for the admission controller. This Markov model incorporates important features such as ...

Keywords: admission control, network management and control, quality of service, queueing/management

9 Parallel and distributed systems and networking: A particle swarm model for swarm-based

 B. Anthony Kadvach, Gary B. Lamont

March 2002 **Proceedings of the 2002 ACM symposium on Applied computing**

Publisher: ACM Press

Full text available:  [pdf\(614.37 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#),

Swarm behavior as demonstrated by flocks of birds, schools of fish, and swarms of insects provides a model for implementing a distributed network of mobile sensor platforms. Such mobile sensor swarm systems are used for surveillance activities. Swarm behavior ensures safe separation between swarm members with respect to collision avoidance. These two properties, when considered in the context of sensors and wireless communications, provide a coverage area ...

Keywords: distributed processing, networking, particle swarms, robotics, wireless

10 A comparative study of bandwidth reservation and admission control schemes in QoS-sensitive networks

Sunghyun Choi, Kang G. Shin

July 2000 **Wireless Networks**, Volume 6 Issue 4

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(329.88 KB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

We compare different bandwidth reservation and admission control schemes in QoS-sensitive networks. We show that the proposed schemes can provide better performance than the existing schemes in terms of bandwidth utilization and admission control success rate. ...

Keywords: bandwidth reservation, admission control, QoS-sensitive networks

11 Group E: network capacity and achievable rate: Fractionally cascaded information in a sensor network

 Jie Gao, Leonidas J. Guibas, John Hershberger, Li Zhang

April 2004 **Proceedings of the third international symposium on Information processing in sensor networks**

Publisher: ACM Press

Full text available:  [pdf\(217.94 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index t](#)

We address the problem of distributed information aggregation and storage in a sensor network. The principle we propose is that a sensor should know a "fraction" of the information in the network, in an exponentially decaying fashion by distance. We show how a sample of the information can be distributed in a distributed fashion, with only a modest amount of additional storage and network traffic. Our study shows that this approach is effective in a sensor network. ...

Keywords: fractional cascading, information aggregation and storage, range searching, sensor networks

12 Special Issue on Medium Access and Call Admission Control Algorithms for Next Generation

 selective neighbor caching scheme for fast handoff in IEEE 802.11 wireless networks

Sangheon Park, Hakyung Jung, Taekyoung Kwon, Yanghee Choi

October 2005 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 9 Issue 4

Publisher: ACM Press

Full text available:  [pdf\(633.68 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#)

Mobility support is one of the most challenging issues in IEEE 802.11 networks. In the proactive mobility support, the network predicts the future movement of mobile stations and proactively adjusts the network parameters to support the mobility. ...

when a mobile host is connected to an access point (AP), its context (e.g. security association c in advance to all of the AP's neighbors to reduce handoff processing time. In this paper, we prop (SNC) scheme, which propagates a mobile host's context only to the selected neighbor APs con:

1 [Data-delay evaluation in integrated wireless networks based on local product-form solution occupancy](#)

Jeffrey E. Wieselthier, Craig M. Barnhart, Anthony Ephremides

December 1996 **Wireless Networks**, Volume 2 Issue 4

Publisher: Kluwer Academic Publishers

Full text available: [pdf\(609.68 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index](#)

In this paper we consider the evaluation of data-packet delay in wireless integrated voice/data networks that support voice in the classical circuit-switched fashion, the voice occupancy process under reasonable modeling assumptions. Although this product-form solution provides an accurate characterization of equilibrium voice-traffic behavior, it does not directly provide a method for data-packet delay. However, examination of each link ...

2 [Information systems curriculum recommendations for the 80s: undergraduate and graduate](#)

Jay F. Nunamaker, J. Daniel Couger, Gordon B. Davis

November 1982 **Communications of the ACM**, Volume 25 Issue 11

Publisher: ACM Press

Full text available: [pdf\(2.20 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index](#)

The recommendations of the 1972 and 1973 ACM Curriculum Committee on Information Systems have been influential in the development of degree programs at the bachelor's, master's, and doctoral levels. The earlier curriculum has been revised and updated based on advances in the field over the past nine years. This report discusses the continuing need for education related to the definition, analysis, design, and management of information systems in organizations. The structure ...

3 [Facial animation & hair: Vision-based control of 3D facial animation](#)

Jin-xiang Chai, Jing Xiao, Jessica Hodgins

July 2003 **Proceedings of the 2003 ACM SIGGRAPH/Eurographics symposium on Computer Animation**

Publisher: Eurographics Association

Full text available: [pdf\(12.59 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index](#)

Controlling and animating the facial expression of a computer-generated 3D character is a difficult task because the face has many degrees of freedom while most available input devices have few. In this paper, we show that a rich set of lifelike facial actions can be created from a preprocessed motion capture dataset. A user can control these actions by acting out the desired motions in front of a video camera. We use a real-time facial tracking system to extract a small set of parameters ...

4 [Programmable execution of multi-layered networks for automatic speech recognition](#)

Y. Bengio, R. Cardin, R. De Mori, E. Merlo
February 1989 **Communications of the ACM**, Volume 32 Issue 2

Publisher: ACM Press

Full text available: pdf(781.61 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index](#)

A set of Multi-Layered Networks allows the integration of information extracted with variable res and frequency domains and to keep the number of links between nodes of the networks small for generalization during learning with a reasonable training set size.

16 Lessons from the battlefield

Thomas P. Vayda

October 1995 **ACM SIGPLAN Notices , Proceedings of the tenth annual conference on Object oriented programming systems, languages, and applications OOPSLA '95**, Volume 30 Issue 10

Publisher: ACM Press

Full text available:  [pdf\(1.57 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The pragmatic aspects of deploying large scale Object Oriented (OO) applications are examined by identifying some of the main obstacles that arise in typical large scale OO projects, and offering effective solutions. This paper is based on a number of actual large scale projects in which the author participated in a significant capacity and solutions that he adopted or developed to deal with the problems encountered.

17 A unified approach for improving QoS and provider revenue in 3G mobile networks

Christoph Lindemann, Marco Lohmann, Axel Thümmel

June 2003 **Mobile Networks and Applications**, Volume 8 Issue 3

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(407.92 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index](#)

In this paper, we introduce a unified approach for the adaptive control of 3G mobile networks in terms of both quality of service (QoS) for mobile subscribers and to increase revenue for service providers. The approach constantly monitors QoS measures as packet loss probability and the current number of users during operation of the network. Based on the values of the QoS measures just observed, the parameters of the admission controller and packet scheduler are adapted.

Keywords: admission control in mobile system, performance evaluation of next generation mobile networks, pricing and revenue optimization, quality of service in mobile systems

18 Communications networks for the force XXI digitized battlefield

Paul Sass

October 1999 **Mobile Networks and Applications**, Volume 4 Issue 3

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(745.29 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index](#)

In striving to meet the increasing demands for timely delivery of multimedia information to the 21st Century, the US Army is undergoing a gradual evolution from its "legacy" communications flexible internetwork architecture based solidly on the underlying communications protocols and commercial Internet. The framework for this new digitized battlefield, as described in the DoD's Architecture (JTA), is taken from t ...
